💀 DeaDY BeaR 🐻 (DE🐻DY)

Official Whitepaper

Version 1.0

🐻 Welcome to DeaDY BeaR

DE🐻DY is a community-driven digital asset built on **PulseChain** that combines transparent smart contract technology with one of the most aggressive supply reductions ever performed.

Unlike many meme tokens that rely on excessive taxes or complicated tokenomics, **DeaDY BeaR was designed around scarcity, transparency, and verifiable on-chain actions.**

The contract is fully verified, the supply reduction is permanently recorded on-chain, and more than half of the remaining supply has been locked.

This is not simply another meme token.

It is a scarce digital asset with transparent tokenomics.

📊 Token Overview

Item	Value
Name	💀 DeaDY BeaR 🐻
Symbol	DE🐻DY
Blockchain	PulseChain
Initial Supply	11,000,000,000,000
Current Supply	9,000,000
Tokens Burned	99%+
Taxes	None
Contract	Verified
Standard	ERC-20

🔥 Massive Supply Burn

The project originally launched with an initial supply of:

11,000,000,000,000 DE🐻DY

Instead of relying on inflation or future minting, the overwhelming majority of the supply was permanently destroyed.

Burn Summary

- Initial Supply
- 11 Trillion Tokens
- Nine Separate Burns
- Approximately 50% each burn
- Final Circulating Supply
- **9,000,000 DE🐻DY**

Every burn is permanently recorded on the blockchain and cannot be reversed.

Scarcity is no longer a roadmap item.

It has already happened.

🔒 Locked Supply

One of the strongest features of DE🐻DY is that **52% of the remaining supply is locked inside the smart contract.**

These tokens cannot simply be traded while they remain locked.

The contract includes a built-in timelock system allowing tokens to remain inaccessible until their release conditions have been met.

This creates additional confidence by demonstrating that a significant portion of the remaining supply has been committed rather than immediately entering circulation.

🚫 No Buy Tax

Buying DE🐻DY is straightforward.

There are:

- No buy taxes
- No hidden fees
- No automatic deductions

The amount purchased is the amount received.

🚫 No Sell Tax

Unlike many modern tokens that charge users every time they sell, DE🐻DY currently operates without buy or sell taxes.

Investors always know exactly how many tokens they own.

No complicated fee structures.

No hidden percentages.

No surprise deductions.

🔥 Manual Burn Capability

The smart contract includes a burn mechanism.

Tokens may be permanently destroyed, reducing supply forever.

Every burned token increases scarcity by permanently removing tokens from circulation.

The contract also inherits OpenZeppelin's ERC20Burnable implementation.

🔒 Built-In Token Locking

The smart contract contains a native time-lock system.

Features include:

• Lock tokens until a future date

• View lock information on-chain

• Unlock automatically after the release time

• Multiple independent locks per wallet

Everything is transparent and verifiable on-chain.

🛡️ Smart Contract Security

The contract is built using audited OpenZeppelin components including:

- ERC20
- ERC20Burnable
- ERC20Permit
- Ownable
- ReentrancyGuard

Additional contract functionality includes:

- Whitelist support
- Marketing wallet configuration
- Time-lock system
- Emergency ERC20 recovery
- DEX router management
- Permit signatures
- Burn support

These features are publicly visible in the verified source code.

🌐 Ecosystem

DE🐻DY can be traded across the PulseChain ecosystem.

Current ecosystem includes:

- PulseX
- PortalXSwap
- EMIT Farm (LP Farming)

- PulseLN
- PulseChain Explorer

Liquidity can also be provided through the DE🐻DY/WPLS trading pair.

💎 Why DE🐻DY?

Many meme projects promise scarcity someday.

DE🐻DY already created it.

Many projects promise transparency.

DE🐻DY has a verified smart contract.

Many projects rely on high taxes.

DE🐻DY does not.

Many projects leave large supplies unlocked.

DE🐻DY has over half of the remaining supply locked inside the contract.

The tokenomics are simple:

- Extremely reduced supply
- Transparent smart contract
- Verified on-chain burns
- Locked token reserves
- No trading taxes
- Community focused

📈 Vision

The long-term goal of DE🐻DY is to become one of PulseChain's recognizable community assets while maintaining transparent tokenomics and an easily verifiable supply model.

Rather than depending on excessive taxation or inflationary mechanics, DE🐻DY focuses on scarcity, openness, and community participation.

As the PulseChain ecosystem grows, DE🐻DY aims to grow alongside it through liquidity, community engagement, and ecosystem integrations.

📋 Token Statistics

Initial Supply

11,000,000,000,000

Supply Burned

Verified on PulseChain

⚠️ Risk Disclosure

Cryptocurrency investments involve significant risk and market volatility.

DE🐻DY does not guarantee future value or financial returns.

Prospective buyers should perform their own research, review the verified smart contract, and make investment decisions based on their own risk tolerance.

🐻 Final Words

The strongest assets cannot be created overnight.

Scarcity cannot be faked once it has been permanently recorded on-chain.

DE🐻DY was built around a simple philosophy:

Burn the supply. Lock a significant portion. Keep the contract transparent. Let the community decide the future.

Welcome to the DeaDY BeaR family.
